El Paso, Tex., Aug. 15, '10

We regret to advise the destruction by fire Sunday morning of the building used by us as temporary quarters during the construction of our new building. Our vaults are intact and stood the fire in good shape but on account of dangerous standing walls and debris which must be removed, it will be two or three days before we can gain an entrance. Our stock of stationery, furniture and fixtures was completely lost. Having secured the furniture formerly used by the National Bank of Commerce we were enabled to open for business as usual in the Fewel building on El Paso Street, and ask our friends and customers to indulge us for any little delays in handling their business until we can gain access to our records and secure new stationery. Work on our new seven story fire proof banking room is going rapidly forward and we hope to occupy it in a very short while.

Very truly yours,

JOHN M. WYATT, Cashier.

Four Generations Enjoy Happy Birthday Dinner

Mrs. E. V. Pickrell, El Paso; Mrs. W. G. Giddings, Ennis, Tex.; daughter, Mrs. B. S. Roberts, Terrell, Tex., granddaughter, and Miss Emily Vincent Roberts, great-granddaughter.

The old fashioned dinner given at noon today in honor of the 72d birthday anniversary of Mrs. E. V. Pickrell, was enjoyed by the family of the 11 descendants of this well known and popular El Paso woman. The family includes four generations, being Mrs. E. V. Pickrell, Mrs. W. G. Giddings, Mrs. B. S. Roberts, and Miss Emily Vincent Roberts.

The birthday dinner was given by Mr. and Mrs. C. S. Pickrell at their Montana street home.

The decorations of the dining room were in white and yellow, the color plan being further carried out as far as possible in the table appointments. A handsome chandelier and a large over yellow was a dainty setting for the beautiful tableware and the old fashioned fruit stand holding flowers, and banked to the table with golden fruit. The center of attraction, however, was the birthday cake, holding 72 candles, each one of which furnished a "good wish" for the honored guest. Place cards of yellow design gave the finishing touches to a most beautiful table. An elegant old fashioned four course dinner was served, the ice and creams being marked with the magic 72. Only the family was present.

MINING AND OIL NEWS.

ACTIVE WORK IN THE BLACK RANGE

Work Is Progressing in the Sierra and Socorro County Districts.

There is considerable activity in the Black Range country in northern Sierra and Socorro counties, N. M.

At Hermosa, the Ocean Wave has installed a steam plant to operate a 120 h. p. Hendrie & Bolthoff hoist and Sullivan compound air compressor. It has also a 20-stamp mill with four Whitley concentrating tables and two slimmers. The mill capacity is 50 tons daily. The company has just purchased a three stamp Merrill mill which is now on the ground and has a saw mill with two circular saws driven by a 40 h. p. engine. The main shaft on the mine is 229 feet deep with levels at 100, 130 and 200 feet. The drift on the 200 level is being run under an old tunnel across the gulch, and a raise will be made of 150 feet to connect with the tunnel for ventilation. The ore occurs in large kidney deposits in chambers from 10 to 15 feet in diameter. The ores are high grade lead and silver.

El Cliff Mining company in the same locality has installed a Partridge hot-blast furnace. This property has 1200 feet of tunnels and a new shaft down 55 feet. East El Cliff, the Las Palomas Chief is driving a 1900 foot tunnel from the creek to connect with an old shaft.

U. S. Treasury. In the Chloride camp a two-compartment shaft is being sunk and is down over 210 feet. At the 108 foot level a drift 212 feet connects with the Eagle shaft No. 1. Drifts have been run north 125 feet and south 140 feet. The average ore runs from \$8 to \$12 per ton in gold, with some silver.

The Black Range Reduction is developing the old Phillipsburg mines, by a shaft. The ore averages \$15 gold and silver per ton. A new steam pump is being installed and has a capacity of 30,000 gallons per hour. The crushers are being installed additional to the 20 stamp mill.

Other Developments. The Gold Dollar mine is being developed, as is also the Gold Reserve, the Golden Star and the Republic group, all being in the Fluorine district. Across the line in Socorro county the Polar Star shows up a large vein, carrying gold.

THE BUCKET EXCAVATOR. A NEW PLACER MACHINE. A new machine called a scraper bucket excavator to separate gold by a dry process is now in use at Quartzite, Arizona.

It has a 75 foot radius so it does not require frequent moving. When moved the excavator and dry washer is carried on rollers. The bucket digs and scrapes up the loose rock from large seams and cracks and has a capacity of one and a half cubic yards, and handles approximately 1200 yards a day.

TORREON SMELTER'S WORK DURING PAST THREE YEARS. The Torreon smelter, during the past three years has treated 770,518 tons of ore of the value of 24,077,063.23 pesos and in the years of 1907, 1908 and 1909 exported silver-lead bars of the value of 30,556,840.25 pesos.

The company has also installed a 150-ton concentrator at its San Diego mine in Santa Barbara. The Torreon smelter was the first in Mexico to install a mechanical self feeding furnaces.

NEW ADDITION TO GO ON THE TOYAH MARKET

Toyah, Tex., Aug. 17.—The Toyah townsite company is now making rapid improvements on the beautiful "artesian park," located a mile northwest of the T. & P. station, the most favorable location that adjoins the town. The section surrounding Artesian park is being cut up into 50x120 feet lots.

A portion of the park is planted with various kinds of vegetables, melons, cantaloupes, etc., which have remarkable growth, going to prove that this water cannot be surpassed for irrigating purposes. Finley Holmes, secretary and treasurer of the company, has this water running to his residence, where it is used to no small advantage.

Following are the officials of the company: T. E. Gibbons, president; Finley Holmes, secretary and treasurer; A. Holmes, vice president; S. Suttmeier, vice president; Directors, T. E. Gibbons, Finley Holmes, A. Holmes, S. Suttmeier and T. F. Tillar, of Galveston, Tex.

All officials are "old timers" here. Let us suggest a dainty frozen dessert. Phone the Elite at time.

End of the Week Bargains

That Can't Be Found Elsewhere

We have a habit of offering bargains that can't be found elsewhere--that is when you consider value and variety. Of course, the following are not all. Only a few of the many good values for tomorrow and the balance of the week.

75c Foulards 43c

Foulards, all pure silk, patterns are good, dots and figures, 75c values; 3 Days Special..... 43c

\$1.50 Taffeta 95c

Full yard wide, fully guaranteed. \$1.50 value..... 95c

75c Burmah Silk 43c

In all the latest colors, finished like Rajah, 75c values, special..... 43c

Evening Silks

Silk for evening dresses, beautiful patterns in cashmere de soie and crepe de chine, \$1.25 yard..... 89c

IT PAYS TO WALK A BLOCK OR TWO

TUCUMCARI CHURCH FOLK HOLD ANNUAL PICNIC.

Storm Sewer Being Constructed for Protection From Inland—New Buildings—Tracks Washed Out.

Tucumcari, N. M., Aug. 17.—Blue Water park, two miles west of Tucumcari, was the scene of the annual picnic of the combined churches of the city. Automobiles, hay wagons and various other conveyances were used to carry the people to the grounds.

The trains of the Fort Worth & Denver are routing by way of Tucumcari on account of the bridge being washed out on its own tracks over the Canadian river. The tracks of the Tucumcari & Memphis, which were damaged by the rains of last week, are again in repair.

J. D. McMurtrie has let the contract to Horne brothers for a new cement and frame bungalow on South Second street. Active work has been begun on the excavation for the foundation. Tom Platt underwent a severe operation. He was resting well at last reports.

Mrs. R. E. Severé is moving her millinery stock into the Heman building on West Main street, preparatory to the fall opening.

The city council is having a double storm sewer built across Second street in front of the Glenrock hotel. This

is to accommodate the sudden floods of lower Second street, which last week invaded the Glenrock hotel to the depth of nearly six inches.

Thos. Bryson is in town visiting old friends.

YOUNG WOMEN OF ALTO ATTEND TEACHERS' INSTITUTE.

Alto, N. M., Aug. 17.—John Linam and daughters, Misses Estelle and Claude, left for Carrizozo, where the two latter go to attend the Lincoln county institute.

Elbert Brown, of Angus, is visiting James Reeder.

D. J. Cox and daughters, Misses Lillian and Mary, left for Barstow, Tex., where the latter will spend the winter with their sister, Mrs. Mace Kirkley.

Charles Schaeffer and family, who have been visiting Mrs. Schaeffer's mother, Mrs. B. F. Robinson, of Parsons, has returned home.

J. H. Hale and family, who have been spending the summer in Alto, left for Roswell and from there they go to Mississippi to spend the winter.

Miss Nora Neavitt, who is teaching at Ruidoso, passed through Alto en route to Carrizozo to attend the Lincoln county institute.

Fred Tully, of Glencoe, is visiting his grandparents, Mr. and Mrs. A. J. Gilmore.

Oliver Jackson left for Tularosa to

superintend the cutting and baling of his alfalfa.

Daily rains are falling in Alto and cattle and horses are beginning to mend.

Miss Mae Gilmore is quite ill with the chickenpox.

DOUGLAS MAN FACES ARREST; EXAMINATION STOPS FUNERAL.

Douglas, Ariz., Aug. 17.—A warrant has been sworn out for the arrest of Elmer Merryfield for the alleged shooting of Talley Burnett by Mack Hughes a brother-in-law of the dead man. Burnett was killed while sitting in the home of Merryfield with the latter's wife, District attorney Williams stopped the funeral of Burnett and had the body returned for an examination. The second funeral was attended by only a few intimate friends.

Carl W. Held, formerly of Fort Smith, Ark., arrived here Tuesday on his way to Bisbee, to take a position on the editorial staff of the Bisbee Daily Review.

Chamberlain's Colic, Cholera and Diarrhoea Remedy is today the best known medicine in use for the relief and cure of bowel complaints. It cures griping, diarrhoea, dysentery, and should be taken at the first unnatural looseness of the bowels. It is equally valuable for children and adults. It always cures. Sold by all druggists.

MINING AND OIL NEWS. OIL IS STRUCK IN TWO TOYAH WELLS

C. E. Kelly of El Paso Said to Be Financially Interested in One.

From the Toyah oil fields, a report is received that in the well being drilled on section 16, block 97, El Paso county, the cable broke and the drill was lost.

Ladies, Why Not Preserve Your Youth and Beauty?

Nothing so detracts from the attractiveness of women as dull, faded, lusterless hair.

There is no excuse for this condition nowadays, because notice is hereby given to the readers of The Herald that Parisian Sage, the quick acting hair restorer, is now on sale in El Paso at the drug store of Kelly & Pollard and is sold with a rigid guarantee at 50 cents a large bottle.

Since its introduction into America, Parisian Sage has had an immense sale, and here are the reasons:

It is safe and harmless. It cures dandruff in two weeks, by killing the dandruff germ. It stops falling hair. It promptly stops itching of the scalp. It makes the hair soft, glossy and luxuriant.

It gives life and beauty to the hair. It is not sticky or greasy. It is the faintest perfumed hair tonic made.

It is the best, the most pleasant and invigorating hair dressing made.

Fight shy of the druggist who offers you a substitute, he is unworthy of your confidence.

Made only in America by Groux Mfg. Co., Buffalo, N. Y. The girl with the famous hair is an average package.

Nothing Better Few As Good

that's the Womens' Oxfords

We are showing at

\$3 and \$3.50 all leathers

KINNEY SHOE Company

QUEEN BESS COMPANY BUYS EL PASO GROUP

The El Paso group of five claims formerly known as the Refugio group, at Mowry, in the Patagonia mountains of southern Arizona, located near the historic old smelter built by Lieut. Sylvester Mowry in 1862, have just been taken over by the Queen Bess Copper company. The owner was S. F. Johnson, who developed the great ore bodies in the Four Metals mines which are in the same camp. A new double compartment shaft will be sunk rapidly to a depth of 500 feet with levels every 100 feet. In an old shaft at a depth of 40 feet sulphide came in and continues to the bottom, 70 feet, numerous samples of which assay two percent copper and \$5.80 gold per ton.

THREE HEROES MINE IS LEASED AND BONDED

C. W. Marsalis, of Lordsburg, N. M., who has been in El Paso has leased and bonded the Three Heroes mines in the Lordsburg district and will begin shipping ore immediately to the smelter. He operated the Superior mine under lease and bond until it was leased and bonded recently by the El Paso owners to the Calumet & Arizona company of Bisbee, who are now operating it.

NEW DRILLS AT TYRONE.

A shaft is being sunk at the Tyrone mining property in the Burro mountain district, Grant county, N. M., and after it has reached the leached-copper zone several thousand feet of cross-cutting will be done. The property is soon to be prospected by means of churn drills. The property adjoins the Chemung mines.

Cure Your Kidneys

Do Not Endanger Life When an El Paso Citizen Shows You the Cure.

Why will people continue to suffer the agonies of kidney complaint, headache, urinary disorders, lameness, back-aches, languor, why allow themselves to become chronic invalids, when a certain cure is offered them?

Doan's Kidney Pills is the remedy to use, because it gives to the kidneys the help they need to perform their work.

If you have any, even one, of the symptoms of kidney diseases, cure yourself now, before diabetes, dropsy or Bright's disease sets in. Read this El Paso testimony:

J. C. Elliott, Court House block, San Antonio street, El Paso, Texas, says: "I was troubled for some time by a dull ache in the small of my back, brought on I believe by heavy lifting. The kidney secretions contained a heavy sediment and were otherwise unnatural. The use of a few boxes of Doan's Kidney Pills, procured at Kelly & Pollard's drug store, corrected these difficulties and I have had no occasion to take a kidney remedy since. At that time I publicly recommended Doan's Kidney Pills, and I can now say that I hold just as high an opinion of them."

For sale by all dealers. Price 50 cents. Foster-Milburn Co., Buffalo, New York, sole agents for the United States.

Remember the name—Doan's—and take no other.

MINING AND OIL NEWS. ARTEAGA DISTRICT OF CHIHUAHUA

Palmarejo, White Chief and Other Properties Located There.

The Arteaga district is in the extreme western part of the state of Chihuahua, Mexico, just north of the Urique district. The principal ore is black silver or argentine in quartz gangue. Free gold is also present, often constituting 60 percent of the metallic value.

The veins now worked carry shoots or kidneys of high grade ore of various sizes, with values of from \$200 upward per ton.

The Palmarejo Mine. The leading mines in the district are the Palmarejo, that has produced steadily over a century. It is equipped with a 50 stamp mill and cyanide plant. The company is changing the method of treatment to all sliming and will install a 300 ton plant. A 12 mile narrow gauge steam train connects the mine and mill, which, however, is to be superseded by an aerial tram, also has a 14 mile mason work ditch to convey water from the Chinaparra river for power purposes.

The White Chief. The White Chief Mining and Milling company has been operating a 40 ton mill on the Chinaparra river. The ores of its mines carry high grade free gold. The treatment is with plate amalgamation, concentration and cyaniding tailings.

There are also several other companies operating in the Arteaga and numerous prospects being opened up.

COAL DEPOSITS OF TEXAS ARE LARGE

Estimated That Supply Will Last State for Three Thousand Years.

The known deposits of Texas coal are estimated to aggregate 8,000,000,000 tons and of lignite 25,000,000,000 tons and will supply Texas 3000 years at the rate of 10,000,000 tons consumption per annum.

The coal production of Texas during 1909 was 1,144,108 tons valued at \$2,714,630. During the same time Texas produced 715,157 tons of lignite, valued at \$592,421.

There are two coal producing districts in Texas, one in the northern counties of Palo Pinto, Parker, Wise and Young counties and the other in the southwestern counties of Maverick and Webb. The lignite production area is in Eastern, Fayette, Hopkins, Houston, Leon, Medina, Milam, Robertson and Wood counties.

There is an extensive, unexplored coal area along the Rio Grande valley. Its northwestern measures extend through Eagle Mountain, El Paso county, 15 miles southeast of El Paso.

CONSOLIDATION OF MANY BURRO MOUNTAIN MINES. A consolidation has been effected of copper mining properties covering practically the entire width of the copper belt in the Burro mountain district and extending along it about three and a half miles, the average width being about one mile, and adjoining the Savanna, Mangus and Burro mountain properties on the north and the Azure Mining company and Tullock group on the south. The Mangus Development has temporarily closed down owing, it is claimed, to the low price of copper.
